IN PLAIN ENGLISH

abdominal aorta

The portion of the largest artery in the body that runs through the abdomen; it supplies oxygenated blood to the abdominal and pelvic organs and the legs.

abdominal aortic aneurysm (AAA)

Sometimes called triple A.

A ballooning out of a segment of artery caused by disease or weakness in the vessel wall (called an aneurysm) that occurs in the portion of the aorta that runs through the abdomen. For more information, see the Abdominal aortic aneurysm page.

abdominoperineal resection

A surgical procedure in which cancer cells in the anus, rectum and part of the large intestine are removed through an incision made in the abdomen.

ablation

See radiofrequency ablation.

abscess

A localized infection consisting of pus surrounded by inflamed tissue.

absence seizure

See petit mal seizure.

absorption

In radiology, the uptake of energy from radiation by the tissue or medium through which it passes. In radiation or medical physics, the number of disintegrations per second of a radionuclide.

acetaminophen

A drug that reduces pain and fever but not inflammation. A member of the family of drugs called analgesics, it is found in many over-the-counter medications, such as Tylenol®.

allergy

A hypersensitive reaction to common, often harmless substances, most of which are found in the environment.

allogeneic

Involving genetically similar but not identical donor in a medical procedure such as a stem cell transplant.

allograft

Tissue graft from a separate donor.

Allopurinol

A drug that lowers an elevated level of uric acid in the blood caused by some cancer treatments.

Alpha-1 antitrypsin (A1AT)

A protein that protects the lung. A1AT deficiency puts a person at risk of developing emphysema or chronic obstructive pulmonary disease (COPD).
